Career Summary

Powder Coating R&D & Technical Service

Overview

■ Personal Profile

- Name : Sangok Hwang
- Date of Birth : July 1, 1980 .
- Phone: +82-10-2678-2889
- E-mail : hsoksy1@naver.com
- Education
  Cheonan Bugil High School (Mar. 1999)
  B.S, Soongsil University (Mar. 2008)
- Military Service : ROK Army, Infantry, Honorably Discharged (JSA/UNC Security Battalion, Panmunjom)
- Certifications
  Engineer, Chemical Industry (HRD Korea, June. 2008)
  Engineer, Gas (HRD Korea, Aug. 2008)
  Engineer, Water Pollution/Environmental (HRD Korea, Aug. 2009)

■ Career History

- **Hand Corporation(wheel manufacture) – 1year**
  Department : Coating Technology
  Role : Coating Process Management

- **AKZONOBEL Powder Coating – 7years (~2018)**
  Department : Product Development Team
  Role : New Product Development per Customer Requirements
  (1) New product development for home appliance makers (Samsung Electronics, LG Electronics, etc.)
  (2) Daewon Kangup, Sungwoo Automotive, Hyundai Motor
  Development of automotive powder coatings and production line stabilization
  (3) INTERPON D certification audits and management
  (4) New market entry into Japan: High-Tg product for Hino Truck chassis frames
  Product launch and joint patent filing; line stabilization for Akebono, NHK, and others

- **KCC Central Research Institute, Powder Coatings Development - 8 years (~2026)**
  Department: Powder Coatings R&D Team
  Role: New Projects and New Certified Product Development
  (1) Qualicoat Class 2 certification for high-weatherability powder coatings
  (2) GMW14664 Type A certification for automotive powder coatings
  (3) Product approvals for agricultural and heavy equipment: HD Hyundai Infracore, LS Mtron, TYM, and other manufacturers
  (4) Heat-dissipating, heat-shielding, and easy-cleaning powder coatings

Core Competencies

1

Customer Support:

New color/design development for home appliance makers (Samsung Electronics, LG Electronics, etc.)

Chemistry conversion for AC outdoor units (Hybrid → Polyester)

Product development and launch for heavy equipment and agricultural machinery (LS Mtron, HD Hyundai Infracore, TYM, etc.)

Product development and quality approval for automotive exterior parts

2

Technical Service:

Process / line stabilization for Hino Truck (Japan) chassis frames

Production line / process stabilization for Kangup, HD Hyundai Infracore, and others

Defect analysis and root-cause investigation for automotive parts → resolution of quality complaints

3

Quality Evaluation:

Holds NACE Class 2 certification

Extensive experience with INTERPON D certification audits and line inspections

GMW14664 Type A domestic product approval obtained (for automotive exterior parts)

Multiple weatherability evaluations and certifications per WOM and OEM standards

4

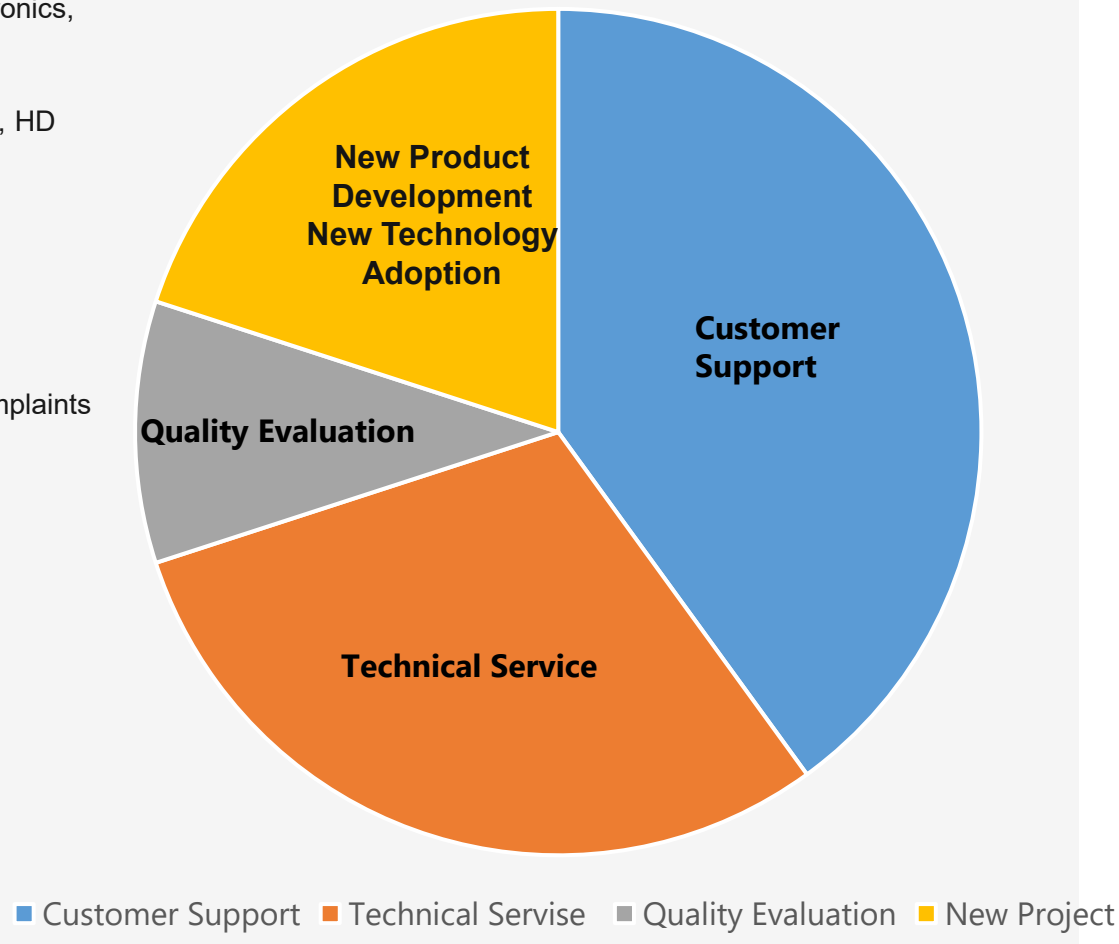

New Product Development:

Heat-dissipating and heat-shielding powder coatings; high-temperature resistant materials

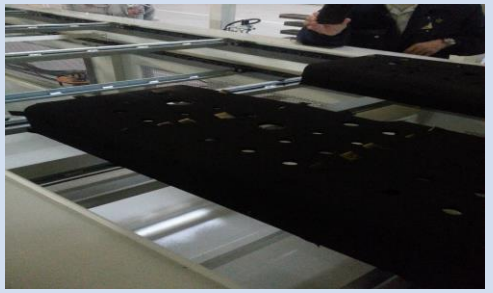

Introduction of new resins for high-weatherability powder coatings and system stabilization

Formulation design capability across Epoxy, Hybrid, Polyester, Polyurethane, and Acrylic

Extensive experience with new resins including SMP, biobased, and silicone resins

Case Study

item	Sector	Detail	Photo
1.Auto chassis frame (Hino Truck)	High Tg TGIC Free polyester	1. High Tg (over 80 ℃) : clamping force test 2. Edge coverage : Zero sagging 3. Corrosion resistance (50μm 1500 h) -Film thickness of corner part is about 50μm	
2. Heavy Machine (HD Infracore)	High weatherability TGIC Free IPA polyester	1. High weatherability : WOM 2000h (△E <4.0) 2. Good Leveling : DOI over 40 3. Orange color matching : Liquid STD (△E <2.0)	
3. Trunk lid's cylinder of car.	Phenolic Epoxy	1. NIR Oven application Cure Temp : 205 ℃ X 45 sec (the top) 135 ℃ X 45 sec (the bottom) 2. Smoke and smell 3. Good appearance
